

SCALE: 1/4" = 1'-0"

NOTES

- 1) All construction shall comply with federal, state, and local building codes as enforced by the local code official.
- 2) All concrete shall be a minimum of 3000 PSI at 28 days cure.
- 3) Plumbing, electrical, and mechanical appliance locations are shown on this plan as a reference for any ducting, piping and/or wiring that may be required in or under slab.
- 4) All footings shall bear 6" minimum into undisturbed soil compacted to 95% standard Proctor density.
- 5) See FEMA Specifications (provided with these plans) for details on the construction of the in-residence cast concrete storm shelter.
